Board of Publications

ANNUAL PUBLICATION OF
THE MEDICAL COLLEGE OF VIRGINIA
RICHMOND, VA.

DEDICATION

To those of the faculty and administration who have left their duties as teachers, willingly, to serve in the services of the United States, we proudly dedicate this yearbook. It is the hope that it will show to them, in the years to come, the admiration and respect that we hold for them.

*"We will gain the inevitable
triumph so help us God"*

Foreword

In this volume, it has been our intention to create the wartime atmosphere which is so prevalent now during our great struggle. The theme deals with wartime America and thus is shown each school's part in the war effort.

May this conflict soon be over and we gain the inevitable triumph so help us God.

We hope you have enjoyed
strolling around at M. C. V.
and now we take you inside
to see our school at work.

THE

SC

To each of the four schools of the Medical College of Virginia falls an important and well defined part in the huge task of winning this war. This year, as in past years, a large percentage of the graduates of this institution will go directly into active service with one of the branches of our armed forces. However, of equal importance is the part played by those who remain at home to keep the civilian population and vital war workers healthy.

Therefore, it is the duty of everyone, in whatever set of circumstances he finds himself, to give willingly of his services wherever or whenever they are needed.

HICOL

KEEP 'EM
FIGHTING

To Our Students

Institutions develop somewhat after the pattern of human development, that is, irregularly, not in all dimensions at the same time. With us the development of physical facilities is definitely halted at this time. However, we are planning new structures for the period immediately after the war in order to avail ourselves of what may then be new possibilities in this direction. While buildings are the least important features of an institution good working conditions which they provide do make their contribution.

Inner strength and power, the qualities least discernible by an outsider at least, are primary objectives of well administered institutions regardless of type. Such qualities are achieved by the operation of many influences, none the least the ability, enthusiasm, and the will of students themselves. Better teaching, better learning, better research, more and greater friends, larger financial resources, better cooperation—these and many other assets are coveted for ourselves. Through them even the least of us can make a substantial contribution.

The Medical College of Virginia is fortunately situated from almost every point of view even to its location within Richmond. Blueprints have already been prepared showing the possibilities of our having a campus although located adjoining the Capitol Square in the heart of the metropolitan area. These changes like others will come to pass with the work of years and in them everyone before and after graduation can have some share.

Sincerely yours,

W. T. SANGER,
President

THE OATH

SWEAR

by Apollo the physician and
Æsculapius & Health & All heal & all the gods & goddesses
that according to my ability & judgement.

I WILL KEEP THIS OATH

this stipulation to reckon him who taught me this Art
equally dear to me as my parents to share my substance
with him & relieve his necessities if required: to look upon
his offspring in the same footing as my own brothers & to teach them this Art
if they shall wish to learn it.

WITHOUT FEE OR STIPULATION

That by precept lecture & every other mode of instruction I
will impart a knowledge of the Art to my own sons & those of my
teachers & to disciples bound by a stipulation & oath

ACCORDING TO THE LAW OF MEDICINE
but to none others. I will follow the system of regimen which
according to my ability & judgement. I consider

FOR THE BENEFIT OF MY PATIENTS

abstain from whatever is deleterious & mischievous. I will give
no deadly medicine to any one if asked nor suggest any such
counsel. In like manner I will not give to a woman a pessary to produce
abortion

**WITH PURITY & WITH HOLINESS I WILL
PASS MY LIFE & PRACTICE MY ART**

I will not cut persons laboring under the stone, but will leave this to be
done by men who are practitioners of this work. Into whatever houses
I enter, I will go into them for the benefit of the sick. I will abstain from
every voluntary act of mischief & corruption. **AND FURTHER**
from the seduction of females or males of freemen & slaves.

Whatever in connection with my professional
practice or not in connection with it, I see or hear,
in the life of men, which ought not to be spoken
of abroad. **I WILL NOT DIVULGE**

as reckoning that all such should be kept secret.
While I continue to keep this Oath unviolated,
may it be granted to me to enjoy life & the practice
of the Art respected by all men in all times!

But should I trespass & violate this Oath
may the reverse be my lot!

SENIOR MEDICAL CLASS HISTORY

People are always getting queer ideas, especially when they are Seniors. We groaned, griped, and struggled along under our load for four long years, and now when it's time to throw off the yoke, we turn around and say, "Why, it only seems like yesterday!" and get that reminiscent look in our respective eye and think back on what has gone before.

Well, about that first year . . . for most of us it was like traveling in a foreign land; we had to learn a new language and develop entirely new ideas. We were as green as the proverbial young bay tree, but we flourished well on a steady diet of anatomy and all its subdivisions. We argued about it at meals, fell asleep over it at night, and recited it in orals to saddened but patient instructors.

The first stones of our foundation having been firmly established, we entered upon our second year in an apprehensive state of mind. Sophomores going on before had impressed us with the hardness of their lot. They reported that the midnight oil would be burnt in large quantities and we found it to be so, but we didn't mind because our minds had caught fire and there was such a vast amount of knowledge with which to keep them fed, that we realized that time was too short as it was. Autopsies, as well as experiments on dogs, frogs, and ourselves helped us to learn to differentiate the normal from the abnormal.

That was the year that the new Medical College Hospital was opened and we were given the privilege of guiding the public through. Proud but tired feet took us home when that was over.

And then the year was finished and we had passed a milestone, for now we were ready for clinical medicine. We not only saw those unfortunate souls so aptly designated as patients, but we were also allowed to come to conclusions about their state of health by any method, within reason, that we could devise. We got up at all hours to assist our Senior with his outside deliveries in a manner befitting our ignorance; and we became the master technicians of our day.

With the feeling that we had reached the peak of intellectual supremacy that only a Junior can know, we came to that oasis in a medical student's career, that exalted state known to all who thumb the pages of Gray and Cecil, the inheritance, the state of being a Senior. We were allowed to be more independent in diagnosing and in treating our clinic and hospital cases. We learned to think on our feet and to accept our responsibilities. Our class has been different from most of the classes that have gone before—in a way it has been more fortunate. Because of this war, of which we will soon be a part, we have realized that our skill will be needed more than ever before. We have been given a greater incentive for more diligent study, more exacting work, and more careful observation.

JUNIOR MEDICAL CLASS HISTORY

July 6, 1942—A red letter day for all students at M. C. V., especially so for the Juniors in medicine starting at long last our hospital and clinical work. All of us felt as green as horned toads the first day of each new service—not quite as frightened, however, as the day we opened Dr. Main's office door (an act performed once a year by each Sophomore student).

After several weeks the schedule was learned—Class, Skull and Bones, Clinic, S. and B., Class, lunch (at S. and B.), Clinic, and Class. Classes were made more exciting by the whispering of "quiz!" (termed filthy rumor) before each lecture.

Gyn. and G. U. (G. C.)—Where we learned trichomonas infestation was no rarity. A fast brush up on Gram's staining was in order.

Pediatrics and Physical Diag.—Practice of trying to hear a soft blowing murmur above the crying of a

little one. Pine Camp—the place we left feeling as low as so many pigmies. 'Twas an all gone sensation not to be able to classify sales, etc.

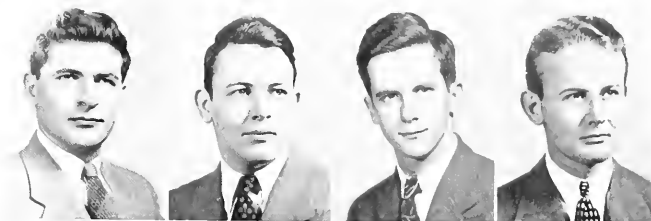

O. B.—Pains continue and—urinalysis (more than usual) C. B. C.'s, P. S. P.'s, loss of or no sleep—Here even "G. A." Brady got a wee bit behind.

E. N. T.—Neck exercise while following the "guiding light" from a head mirror. T. and A. patients, with a sigh o' relief when too young to talk.

Medicine—Histories and physicals galore and a practice of individual bedside manner when no one was looking—provided there was time between the fulfilling of little items on the request sheet.

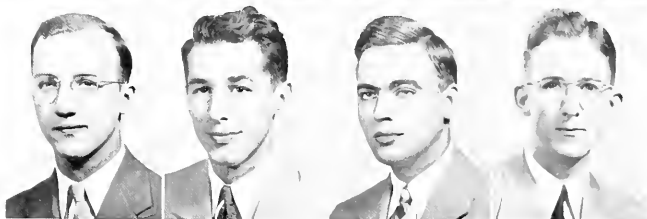

All in all it has been a grand year, however, we are all anxious to start the fourth. "Let's go." (Quote Rawls.)

SOPHOMORE MEDICAL CLASS HISTORY

The transformation from the stage of the neophyte to that of the wise fool took place in July this year instead of September.

We were soon introduced to the intricacies of the stethoscope, the ophthalmoscope, and percussion hammer, those mysterious instruments of our superiors. With these dangling from our necks and pockets, we were much more qualified to instruct our uninformed underlings—the Freshmen—to say nothing of the Resident Staff, as to how to get around at M. C. V.

In Physical Diagnosis, we learned that a rachitic rosary is not like a string of pearls, and that a thrill might come from many things. But, in the words of one of our leading diagnosticians, "Oh, I'm convinced," if we were shown examples of everything

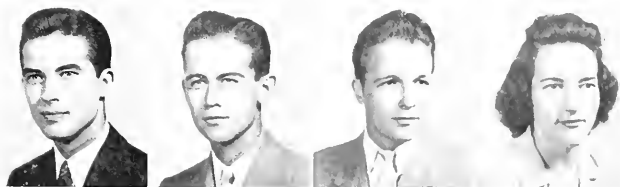

from Koplik's spots to Harrison's groove, physical diagnosis would be simple.

Eight weeks of surgery lectures seemed to at last place us one step closer to our dreams of scapels, scrub gowns and hemostats. However, we've found one must first learn about the leucocytes rounding up the bacteria which hide behind sutures before attempting our first appendectomy.

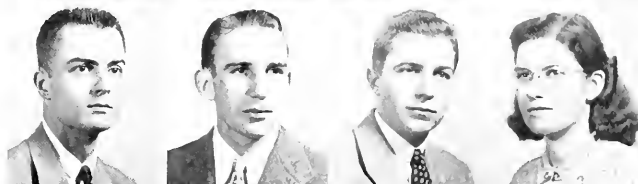

As for blood counts, "modesty forbids" us to tell just how well we can hit that line. And in Physiology we've met the paradox of our Sophomore lives. Does "smooch muscle" imply its function?

The accelerated, wartime program has made us feel more acutely the seriousness of the work for which we are preparing, and the end of the year finds us a little less foolish and much the wiser.

FRESHMAN MEDICAL CLASS HISTORY

For three, four, five or perhaps more years we had been dreaming dreams of that day in September when we would begin our course of study in the Medical College of Virginia. September would be the month; for little did anyone dream or imagine that the "Pearl Harbor" incident would ever occur. After that tragic event in our National History the month of our adoption was changed.

On a warm summer day, July 6, 1942, with eagerness and with a sense of extraordinary responsibility we began the history of the Freshman Class in Medicine at M. C. V. of WORLD WAR II.

As we heard and read again and again the call for physicians, a strange feeling of duty seemed to impel each one in our class of eighty.

No murmur of discontent because of the heat of summer was audible; no sighs of regret or disappointment for the missed vacation were heard. So beneath our electric fans, inspired by the chance to serve our

nation, the nights with incredible speed breezed past into history.

Each night of study became more fascinating as each new page of Gray's Anatomy was turned. An inspiring thrill it was as our able instructors introduced us to the knowledge of the greatness of the structure of man.

Each fact learned was weighted with the distinct cry for help; help in saving the lives of our countrymen; help in rehabilitating our fellowmen; help in preventing pandemics that are not respectors of any man.

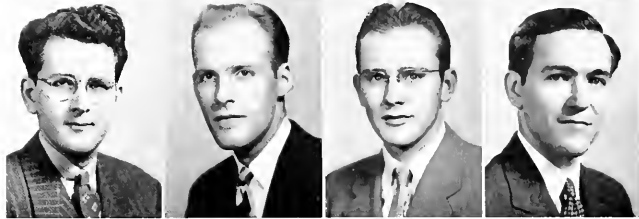

With a hope, in a not too distant future of answering that cry, the days of our first year were days of delight, not days of drudgery.

The story of this first year in medicine is the summation of the efforts of our eighty fellow classmates to fulfill a consuming desire to move a step closer to serving and preserving those who strive for freedom.

"The
Anatomist"

Dr. John W. Brodnax is the one responsible for these drawings. In 1886 he graduated in Pharmacy and in 1892 he graduated in Medicine at the Medical College of Virginia. For two years prior to studying Medicine, he attended the Art Student League in New York. The bronze bust of Dr. Hunter McGuire which stands in its niche on the stairway of M.C.V. is probably his most notable achievement. From

1893 until his death he held various positions at the department of Anatomy at the University College of Medicine and Medical College of Virginia, having been professor of Anatomy in the former and associated professor in the latter institution. As a teacher, none was ever more beloved by the entire student body who in a mass attended his funeral in October, 1926.

"Only
a
Dream"

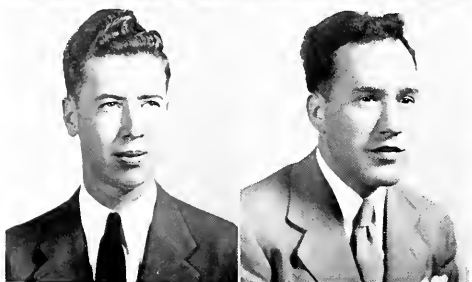

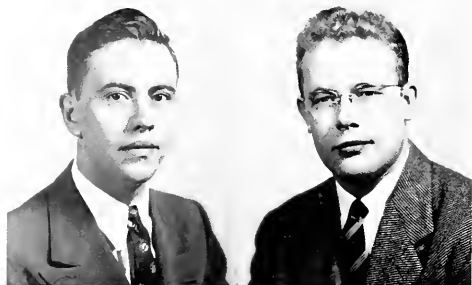

SCHOOL OF DENTISTRY

DR. ROBERT F. EASTMAN

To a gentleman whose unceasing efforts have done much for the students' enlightenment, the School of Dentistry wishes to express its respect and profound admiration.

SENIOR DENTAL CLASS HISTORY

The story of the Class of '43 cannot be told completely in just a few words, but we hope that in future years as we browse through these pages again, some of the memories of the school and the spirit of camaraderie of the former classmates will return.

It was only a few years ago that we embarked into the study of Dentistry and bravely waded into the curricula, constantly beset by pitfalls, trials and tribulations, but emerging victorious from the morass of odoriferous cadavers, surrealistic coecal cubes, and millions of wax teeth; we climbed the pinnacle of success dragging our tightly clutched diplomas behind us.

Our Freshman year was especially notable as we attended the laying of the cornerstone for the great M. C. V. Hospital. We gambolled lightly into the Sophomore year, laughing delightedly at the amusing tricks of Dr. Negus; cursing furiously as we man-handled delicate wax patterns in the Crown and Bridge course.

Our class, though now depleted in number, had now reached a state of coherency and unity, adopting the motto, "All for one, one for all" or "Let's take a vote."

In building up to the climax of our story, we need only mention the Junior year. Heeding the warning of our professors that a "tooth in the head is worth three in the jar," we began to apply our techniques and theories to live patients.

Memories of the Prosthetic Clinic will be further enhanced as we fondly see old "A. P." getting organized" and giving out with words of wise advice.

The Senior year was the one in which levity was replaced by dignity; ignorance hidden by an intellectual front. Belatedly, we realize our indebtedness to our faculty for their diligent and unceasing efforts to equip us for a career devoted to the welfare of mankind.

JUNIOR DENTAL CLASS HISTORY

Our Junior year in the School of Dentistry has been climaxed by the fulfillment of the hopes of our Freshman and Sophomore years of our education; for in this year, for the first time, we have actually worked on human patients. Heretofore, all our restorations, dentures, and bridges had been constructed on models, dentiforms, and manikins, but then, one anxious day, we gave our first prophylaxis with nervous, palsied hands and wasted movements due to the mouth mirror confusion. Many times too we have heard these agonizing questions: "How many restorations have you checked off?" "How's your dentures coming along?" "Have a broken appointment?"

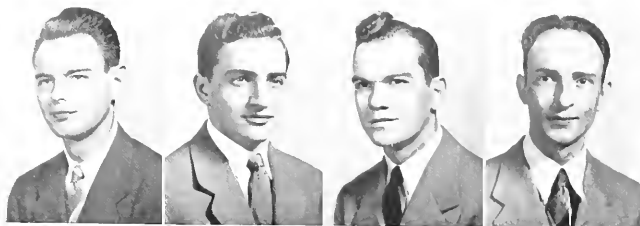

Then, too, many of our futures have been scheduled for us by our enlisting in our Army or Navy. We were only too happy to do our share by indicating to Uncle

Sam our intention to aid him upon graduation. When we saw our relatives, friends, and professors sacrificing their careers, yes, even their lives in the horrible conflict, we were only too eager to do our bit.

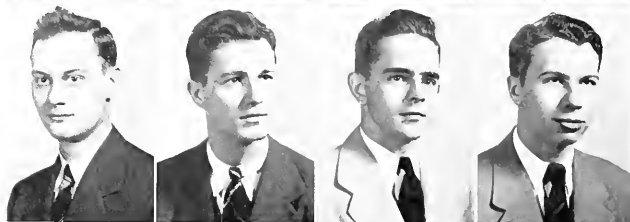

Then, too, there were our fine classmates of our Sophomore year who found it wise to improve their techniques by continuing the same work for an added year. To them go our sincerest best wishes for success and an added thought; it takes courage to repeat a year in a professional school. To those of our classmates who are following other lines of endeavor, our hopes for your success also.

So we, the Junior class, wish you, the graduating Seniors, Godspeed; and to you poor fellows following us, the best of luck.

SOPHOMORE DENTAL CLASS HISTORY

"Freshmen," how well we remember that word, and to us it brings back everlasting memories that continually flash before our eyes. For it was back in September of '41 that we again accustomed our ears to the familiar calling by the upper classmen, "You Freshmen better get busy." It was a challenge, one that we accepted in good spirits amid the strife and chaos of a troubled world. Flash! a gust of wind! hokus pokus! and to our surprise we finished that year, tired and a mite weary, but still willing to believe the future would wish us well.

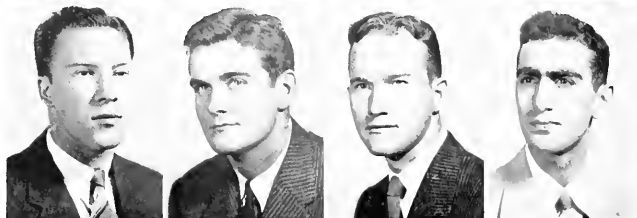

"Sophomores," by definition, "wise fools," and how true these words sound to us now. For it seems

only a fortnight ago that we walked into our new lab., ready and determined to grasp the knowledge which fell our way. Six new men joined us at this time to continue along with us toward the goal we are seeking. How well we remember those hot July afternoons when we would try to manipulate wax in Prosthetics, or cast a ring in Crown and Bridge. These memories will forever remain with us. Now as we come to another crossroad, we can't help glancing back over the road we have traveled, but our eyes are quickly focused straight ahead again while we try to visualize the adventures we are to encounter in the coming years.

FRESHMAN DENTAL CLASS HISTORY

The Freshman Dental Class of 1942-43 of the Medical College of Virginia began its work under conditions that had not been encountered for over twenty years. The United States was at war with the Axis. This dental class was the largest ever to enter the Medical College of Virginia. It was composed of fifty students who began work on July fifth, three months early, under an accelerated program suggested by the government. According to this plan a student was required to attend school the entire year, thereby completing the requirements for graduation in three

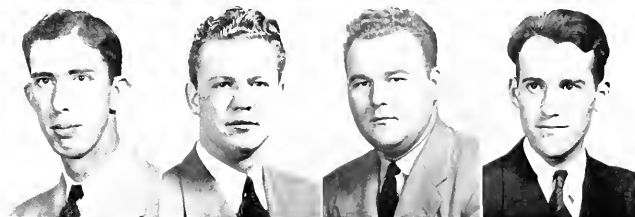

years rather than four. In addition, it was necessary to apply for a commission in the Medical Administrative Reserve of the Army or the Navy. Commissions were made accessible to allow the student to finish the education necessary to serve as a dentist in the armed forces.

Although the temperature during the past summer broke all records of past years in Richmond, and in some of the courses sixteen weeks' work was covered in eleven weeks, the students' spirit was very high—they were doing their part in the war effort.

SENIOR PHARMACY CLASS HISTORY

We entered the Apothecary School, just as any other normal class, altho the flames of World War II had begun to burn in Europe, making us the first class to enter school under the threat of global war. However, Frank—and honest—Pitts offered a bigger threat than any war. Bob Keeling was elected our first president, as many embryonic politicians came into the light, from both the Phi Gamma and Kappa Psi ranks.

During our second year, Dr. Kaufman and Mr. Early joined the faculty; Dr. Hughes and Mr. Roberts joined the Navy. Dr. Crockett, representing all that is fine and great in Pharmacy as a profession, and in man as a gentleman, died, leaving a huge gap in our faculty, and in the general morale and spirit of the school. We gathered several transfers—Lash and Kafka; helped dedicate the M. C. V. hospital, a true landmark in the history of this institution, and ended the year with a class banquet at Westwood, with Keeling still president, and the Phi Gamma political machine still in high gear.

In our Junior year, this war, which had seemed so far away, became a reality, for it was in Dr. Rowe's

Galenical Lab., when we heard President Roosevelt make his impressive December eighth address, asking for war. From this date on, war interest, as well as effect, ran at high tide, affecting changes in our every mode of life.

The new Crockett Memorial Laboratory was also dedicated this year. Our class had the honor of being the first to meet there. The Student Branch of the A. Ph. A. was founded, the majority of the charter members coming from our class, as well as the first president. Jerry McKenny joined the Navy. Kappa Psi's political machine started rolling on the home stretch—Jimmy Lewis was our president.

Coming into the Senior year, we found that only ten of the original thirty-five of the Freshman Class were with us. We are the first class to graduate under the new Wartime Accelerated Program. The majority of the class are in the Navy, Army, or Marine Reserve Corps. Unlike other classes our private practice of Pharmacy will not be taken up for the duration and six months thereafter. Axis-ism will then be discontinued forever, and six months thereafter . . .

JUNIOR PHARMACY CLASS HISTORY

In July, 1942, we as Juniors started back to school eager to resume our studies, in order that we might sooner be fitted for life in the outside world, whether in military or civilian status.

Our class, starting with about fifty students, has been greatly reduced in the last two years. On the rough and rugged path which we have trod, many have fallen by the wayside, but there are about twenty of us who are still in the fight. Our armed forces have benefited from the enlistment of many of our fellow classmates, who felt that they could do a much better job and be of more service by joining now. There are a few in our class who have joined a reserve

corps; so that they will be able to finish their college education and be officer material for the branches which they have chosen.

We have progressed rapidly from our Freshman year by the careful guidance of our most interested and understanding professors. It is our only hope that we can give due honor to this training and leadership when we arrive in the professional world.

It is a good feeling to be a Junior, having finished two tough years, but there is always the promise of greater thrills ahead. Look out, Seniors! Here we come to break all records as the best class in the whole history of the School of Pharmacy, M. C. V.

SOPHOMORE PHARMACY CLASS HISTORY

The Class of '44 came to class on September 15, 1941 well frightened and prepared for the worst. Everybody was dubious. And why not? We were the Freshman Class, and Freshmen are supposed to be scared. We knew that we had a job the like of which we'd never tackled before. We wondered how we'd tackle it, and the wonderment frightened us. We gazed in nothing less than reverence at the Seniors in their black robes on their way to convocation. Four years is a long road and carries many bypaths!

Now, two years have slipped past already and we have hardly had a glance around. Are four years really so long? We believe not by now.

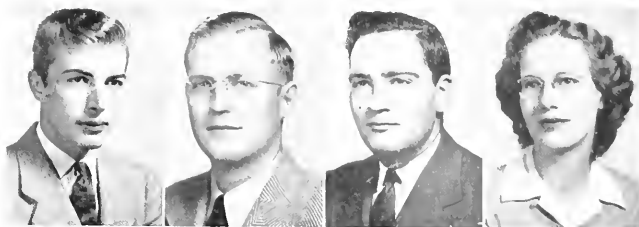

During the two unbelievably short years much has happened. The dominating outside disturbance, and rightly so, has been the war. Uncle Sam is girding for war, and girding right from within our midst.

There are many of our class taken from us by the cruel claws of war. The gap left in our group can be bridged only by the pleasant memories of the friendly classmates now in the services of our country.

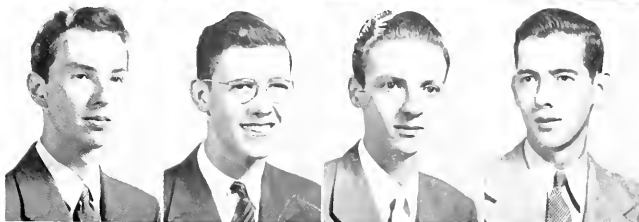

The war had its other effects, too. We found out how it feels to have a summer vacation of only one month instead of three. We worked doubly hard in the July and August heat. But I wonder if we couldn't have worked a little harder?

Now as we go on to take the role of Juniors, we make our vows anew. We wonder if the next two years will be long enough to accomplish what must be accomplished. Will we, in two years, be able to store up enough memories of good times and friendships to last through the inevitably hard times ahead of us? May our already-made friendships be as lasting as their memories!

FRESHMAN PHARMACY CLASS HISTORY

For the first time in the history of the School of Pharmacy, the Class of 1945 started a three-year accelerated course on July 6th. The gravity of war put determination in our hearts to get all the education we could in order that we may better serve our country and our fellow men.

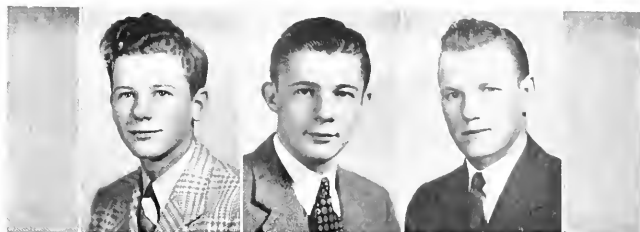

Life for Freshmen is none too easy at best, and the heat of the summer made studying difficult at times. But the patience of our professors, the friendly attitude of the upper classmen and the pleasant social gatherings, gave us encouragement and in-

spiration to make the most of every day. We shall always remember with pleasure the parties given by Phi Gam, Kappa Psi, the Student Body picnic and the Mortar and Pestle dance.

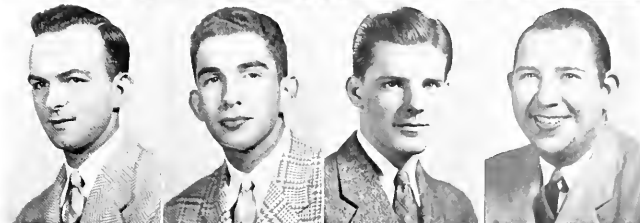

We regretted very much losing Mrs. Hughes and Mr. Foster, but welcome Dr. Bailey from the University of Richmond and Mr. Givers from John Marshall High School.

The drafting of 18 and 19 year olds makes the future for Freshmen very uncertain, but in each of us is a spirit of willingness to fall in line when called.

SENIOR NURSING CLASS HISTORY

This class began as all classes do, ignorant and untutored, full of ideas that are not now worth remembering. We have traveled a long way, and we have yet farther to go. We have often thought that we would not reach this place, but now that we are here, the end is in sight. There are not as many of us as there were in the beginning, but those of us who will see the finish look forward to many good years of service. Some of us will go into the armed forces, while some will stay at home in other capacities.

We are grateful to the Medical College of Virginia for the training which we have received in these three years. We feel sure that it is the best training that we could have obtained anywhere. Wherever we may go from here, we shall carry the insignia of M. C. V.

We have been student nurses during a very trying period in the history of the United States, and we have felt many of the hardships caused by war. But it is possible that our experiences in a wartime hospital may help to make us better nurses.

JUNIOR NURSING CLASS HISTORY

Another year gone far behind us, pushed aside by fast moving events and our thoughts of future achievements. We have big ideas and big plans which we want to rupture from our minds and become a definite thing in the future. The shyness and hesitation of our preclinical and freshman days are gone, replaced now by a certain feeling of security in this, our profession.

The present worldly disturbance makes it necessary for us to work harder than ever and to put even more than heart and soul into our work, and yet we do it willingly and smilingly.

The fact that we take responsibilities now which would have, at one time, frightened us makes us lift our heads and proudly state, "We are doing our part."

Each early morn as we don the white cap, that first made us feel our place in our chosen field, we are thankful that we are the ones who are going to aid some disabled being and relieve his suffering.

Rather than delight over our accomplishments and

the obstacles overcome in the past, we work fervently on new accomplishments and, though bigger obstacles may arise, we know that now we are better equipped and better able to erase these, too, and go on ahead clearing the way.

We all do not have ideas and plans of being deans, supervisors, and head nurses, but we do have ideas of being a big part of this extensive profession, and being a part of the better part of it.

Whatever our chosen spot in this large field, we hope to be a real specimen of what the perfect nurse should be.

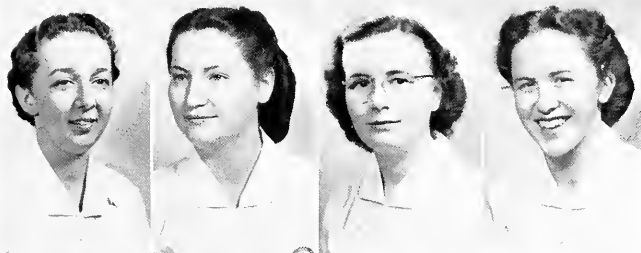

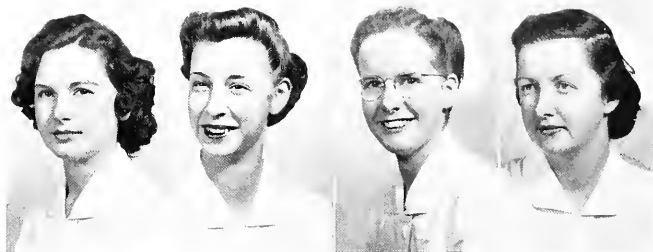

'Way back in our minds, tucked away in a corner, will always lie thoughts of our instructors and the difficult times they had trying to get our weak brains to absorb the knowledge they all but handed us.

We keep looking ahead, hoping that our last year at M. C. V. will be as grand and glorious as the preceding ones and may we, the Class of '44, always—sail our ships of joy on oceans of hope. . . .

FRATERNI

Fraternity should go beyond our school life and surroundings. Fraternal life and purpose in one's love for his fellow man will be demonstrated on the varied fields throughout this world locked in mortal combat.

May the fraternal greeting of brotherly love be predominant in the years of peace to follow.

"... A cooperative enterprise organized and governed by the professional fraternities with the advice and assistance of the faculty."

This year found a new student organization on the scene. Its membership—representatives from fraternities in all three schools; its meeting place—a conference table; its purpose—to effect a closer understanding and cooperation by the discussion of mutual problems. Unique in structure, it can act both as a unit and through its committees of Medicine, Dentistry, and Pharmacy.

ACTIVIT

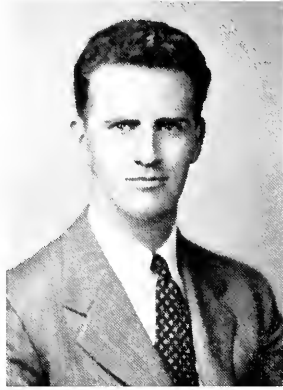

Our activities are many—Student Government with the Executive Committee and Honor Council, *X-Ray, Skull and Bones*, Athletic Association, School Orchestra, Dames' Club, and Alumni Association. These have become an asset to both the student and the school during the past years.

May the activities that we engage in here at Medical College be a help rather than a hinderance to all of us in the years ahead.

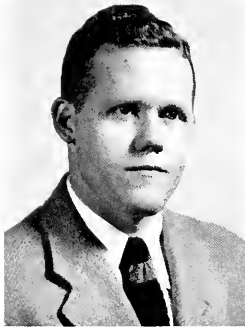

I E S

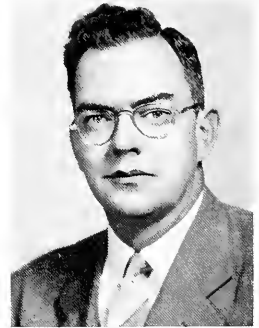

STUDENT GOVERNMENT

President
C. R. RILEY

Vice-President
H. W. BONIFER

Secretary
R. T. SHEPHERD

Treasurer
N. M. KIMBOROUGH

The Student Body Government aims to promote college activities, better student relations, settle affairs for the Student Body in its best interests, and strives for a greater college in every way.

Though we have performed many other acts, the Student Body Government of this year has worked longest and hardest on two new projects. We have tried to make a better college: (1) by formulating a plan for School Councils, designed to better student-faculty relations and to attempt to settle student-faculty problems in the several schools; (2) by actively supporting the "Student Union" movement for a college social and recreation center. We have found that going directly to the college authorities to discuss in joint council problems concerning both groups to be of the utmost helpfulness in their solution.

By the fact that our Student Body governs itself by means of its own Constitution, we are thereby placed as individuals in a democratic sphere, and are

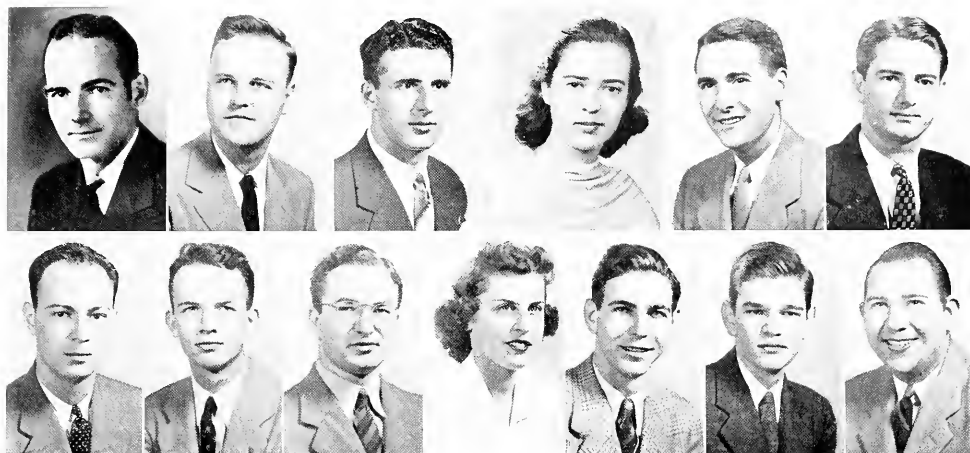

thus taught by justly and intelligently conducting our own affairs the principles of true democracy. Likewise in strictly adhering to our Honor Code we are imbued with a code of ethics to aspire to in our professional life.

The Student Body has had numerous functions, social and athletic. The Student Body has rapidly adopted itself to the accelerated education program caused by the War.

The Student Body Government wishes to thank all those people, too numerous to specify, students, faculty, and others about the college who have given of their time to help us and in such a cooperative and charitable manner.

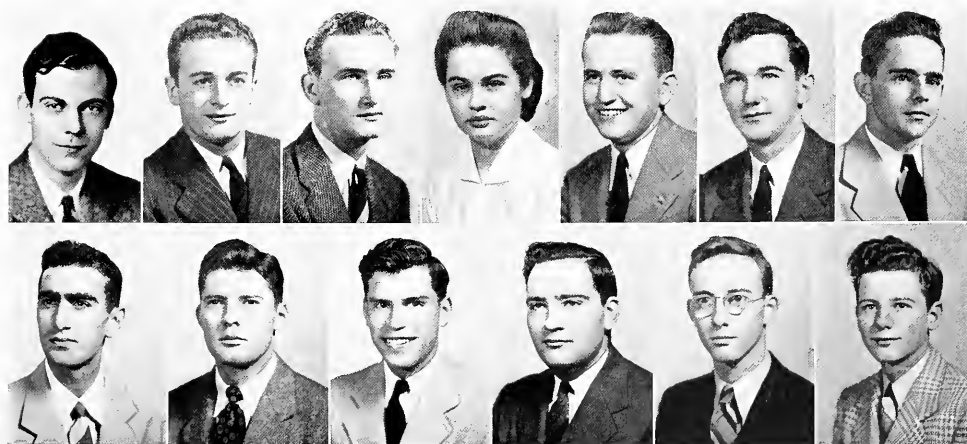

To all the graduates the Student Body Government wishes them the greatest success in their careers and expresses a sincere hope for their becoming active in the Alumni Association.

Present conditions make it hard to get out a publication with the accelerated program that is in effect at the Medical College of Virginia.

The staff has worked diligently to give you some idea of the effect of the present conflict on our future. The present has been

depicted by the volume as a written reminder to the present Senior Class in years to come.

The ideas and efforts are submitted here with the hope that sometime during the present or future years they may bring back fond recollections.

The *Skull and Bones* Newspaper of the Medical College of Virginia has undergone a lot of changes in the past year. The editorship has changed three times and the staff has been continually changing. The staff has been under a strain the entire year to edit a paper that is worthy of the Medical College. What the staff has gone through you will never know, but it has been in there fighting and that fight has made the *Skull and Bones* what it is.

I am proud to be the Editor of a paper with such a fine staff as the *Skull and Bones*. They have stuck beside the paper for the best. We have tried in every way possible to make it a better paper, one which every student would enjoy reading. Whether we have pleased you or not we don't know, but we have done our best.

G. W. GLOVER
Editor

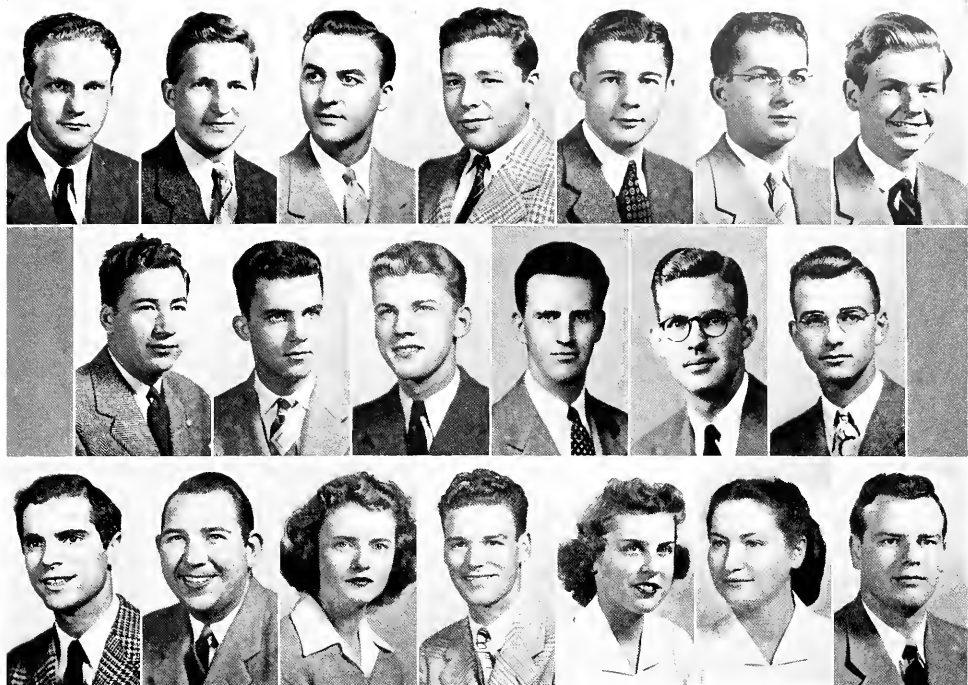

S. H. CATRON, JR.
Business Manager

Many new columns have been tried, some have met with a lot of criticism and have been discontinued, some lasted through the year.

It was indeed a pleasure to be the Editor of the *Skull and Bones*. I would like to take this opportunity to thank the staff for their wonderful help and the faculty which has submitted much news. I would like to thank one of the faculty in particular who would not let me publish his name after the many articles he has turned in.

I hope in the future that more interest can be found in the *Skull and Bones* for all the students of M. C. V. It is by their interest and help that the paper is an asset to the school. Here's looking forward for a bigger and better newspaper . . . Thanks,

The Editor

The Docs of M.C.V. won six and lost three basketball games which was exceptionally well considering the handicaps suffered. The varsity started the season off with a bang by winning the first four straight. So ends this season for a scrapping team from M.C.V.

The Central Y. M. C. A. moved to its modern and spacious new home on Grace Street this year. Mr. Larrick, who handles the M. C. V. branch, was asked at every corner by students eager to join this organization.

Under his capable leadership, this branch has grown until it has a large representation from each school. To Mr. Larrick, let us say that we will have many friends here, but the one that we will always remember is "Father" Larrick.

FIRST ALUMNI OF M. C. V.'S ACCELERATED CLASSES

Another class is graduating. Another group is leaving M.C.V., and each member of it is going out to perform individual duties. It is not an easy world you are going into. The weak and the doubting may fail, but you who are men will survive, and great will be the honor you shall win. You must realize that the inheritance of your generation is toil, sweat, and

sorrow. But you must also know that out of the bitterest battle, the sweetest victory is won. You are to be envied the glory of solving the problems you will meet, for the tasks of the young graduates today are tasks for giants. "But the time that awaits you is the time when giants will walk again in the land. Be staunch, keep the faith, and you will walk among the giants."

FEATURE

The midwives and plumbers, pill rollers and Bessies once in a while let down the barriers of Medicine, Dentistry, Pharmacy, and Nursing to seek a lighter vein than is befitting professional dignity.

From snapshots taken by our roving photographers on these rare occasions, an attempt has been made to preserve a pictorial record of this frivolity for posterity.

Louis and Roslyn Simon

A CAPITAL IDEA . . .

In most instances the medical practitioner cannot leave his family an established business as a source of livelihood. Only through the accumulation of income-producing capital can he project his earning power into the future for the benefit of those dependent upon him.

No plan as yet devised for creating income-producing capital can serve him so quickly and so surely as life insurance.

MILK . . .

“THERE should be more competition and more recognition given to the per capita consumption of milk in communities,” urges Dr. John L. Rice of New York City. “High milk consumption is as important a factor in community health as many other things to which great attention is given.”

Congratulations and best wishes in the practice of your high and noble profession.

Our school offers many advantages to those who wish to enter the nursing profession. Complete information furnished upon request.

"IS THIS PRODUCT COUNCIL ACCEPTED?"

This is the first question many physicians ask the detail man, when a new product is presented.

MEAD PRODUCTS COUNCIL-ON-PHARMACY ACCEPTED:

Mead's Oleum Percomorphum 50% With Viosterol (liquid and capsules); Mead's Cod Liver Oil Fortified With Percomorph Liver Oil; Mead's Viosterol in Halibut Liver Oil (liquid and capsules); Mead's Cod Liver Oil With Viosterol; Mead's Viosterol in Oil; Mead's Standardized Cod Liver Oil; Mead's Halibut Liver Oil; Mead's Mineral Oil With Malt Syrup; Mead's Ascorbic Acid Tablets; Mead's Thiamine Hydrochloride Tablets; Mead's Niacin Tablets; Mead's Menadione in Oil.

•

MEAD PRODUCTS, COUNCIL-ON-FOODS ACCEPTED:

Dextri-Maltose Nos. 1, 2, & 3; Mead's Dextri-Maltose With Yeast Extract and Iron; Pabulum; Mead's Cereal; Mead's Brewers Yeast (powder and tablets); Mead's Powdered Protein Milk; Mead's Powdered Lactic Acid Milk Nos. 1 and 2; Alacta; Casec; Sobee; Olac.

ALL MEAD PRODUCTS
ARE COUNCIL-ACCEPTED

If the detail man answers, "No," the doctor saves time by saying, "Come around again when the Council accepts your product."

If the detail man answers, "Yes," the doctor knows that the composition of the product has been carefully verified, and that members of the Council have scrutinized the label, weighed the evidence, checked the claims, and agreed that the product merits the confidence of the physician. The doctor can ask his own questions, and make his own decision about using the product, but not only has he saved himself a vast amount of time but he has derived the benefit of a fearless, expert, fact-finding body whose sole purpose is to protect him and his patient.

No one physician, even if he were qualified, could afford to devote so much time and study to every new product. His Council renders this service for him, freely. Nowhere else in the world is there a group that performs the functions so ably served by the Council on Pharmacy and Chemistry and the Council on Foods.

Mead Johnson & Company cooperates with both Councils, not because we have to but because we want to. Our detail men can always answer: "Yes, this Mead Product is Council-Accepted."

MEAD JOHNSON & COMPANY
EVANSVILLE, IND., U. S. A.

Please enclose professional card when requesting samples of Mead Johnson products to cooperate in preventing their reaching unauthorized persons

*Why do
they still
ring
Church
Bells on
Sunday?*

An advance man for a circus once suggested to a small town storekeeper that he take space on the circus posters.

"Why should I advertise?" countered the storekeeper. "Been here twenty years. Everybody knows me!"

The circus man pointed to a church across the street. "How long has that been there?" he asked.

"About a hundred years, I'd say."

"And yet," exclaimed the circus man, "they still ring the church bell every Sunday."

Today, many an executive, working day and night to fill war orders, is tempted to say, "Why should we advertise our business? We're cramming capacity now."

Truth is that the crammed capacity of today is only temporary.

There will be a tomorrow—a tomorrow in which each business will sorely need a regular and friendly trade to consume an expanded post-war production.

The maintenance of a friendly trade for that tomorrow is the purpose of the Company.
